Regional market knowledge / strong channel network. Distribution and warehousing facilities in Dubai

Best-of-breed products in Servers and Data Storage, Networking, Wireless and Collaboration, Backup and DR, IT Security and Surveillance

What Do We Do?

Core & Advanced Technology Solutions

These are what we consider the fundamental solutions needed for any organization's ICT set up. In other words these are the must have technologies in order to build your basic IT infrastructure.

Your Core Technology Solutions covers your servers, desktops, laptops, storage, operating systems, local area network, IP telephony, wireless network, firewall and UTM devices and the biometric access control for your office.

Advanced Technology Solutions mainly focusses on advanced security aspects of your ICT infrastructure. These technologies offer in depth and very intricate security options for your ICT set-up from internal and external threats. Strong security protects your most important business assets: your network, your vital company information, and your reputation. Combining security components into one system makes them easier to deploy and manage, especially among multiple sites. At the same time we provide solutions to improve efficiency of your wide area traffic thereby bringing huge cost savings for your WAN costs.

OUR SOLUTIONS

REAMANAGER

It's an online system that facilitates showing, managing & marketing Real Estate for both companies and customers using Mobile & VR Devices.

With ReaManager potential customers are a click away from virtually visiting, furnishing, and accessing all information needed about your real estate. Saving both of you loads of time and money!

It also provides a live 3d experience for the user.

ReaManager transforms the static 2D & 3D maps into interactive ones through smart devices

Padico Holding uses the ReaManager system for their building (Prico House 2)

REAL ESTATE DEVELOPERS CAN NOW FORGET ABOUT THE HUSTLE OF RENTING OR SELLING THE REAL ESTATE...

ReaManager has a lot of features, we are here to mention the main features that the system has. We also can develop new customized features based on the customer needs:

1. Virtual Walls:
Ability to add or remove walls within the real estate easily

2. Cart System:
Ability to add or remove real estates, keeping track of the total space/price of the added items

3. Control Panel:
Ability for the owner to modify prices, status, dates, payments, etc. for each real estate through the control panel

OUR SOLUTIONS

VR EXPO SHOP

Virtual Showrooms Platform

Jawwal uses The VR Expo Shop system

It's a virtual exhibition system that moves the marketing and customer service to the next generation.

It presents all the services and products of a company to its customers through an immersive virtual world using Virtual Reality Headset (VR).

The system uses real-time hand tracking instead of wireless controllers to interact with virtual items, and it is customizable based on the company's needs & requirements.

Use your HANDS instead of traditional input devices to interact with virtual items and the virtual world!

OUR SOLUTIONS

THE VIRTUAL BANK

Virtual Reality Bank Platform

We provide you with a Virtual Reality (VR) System that simulateing all the bank's features and applications

Bank customers can have a secure banking experience with a simple hand gesture

Virtual Currency

Real currency and ATM card simulation instead of real ones within the VR

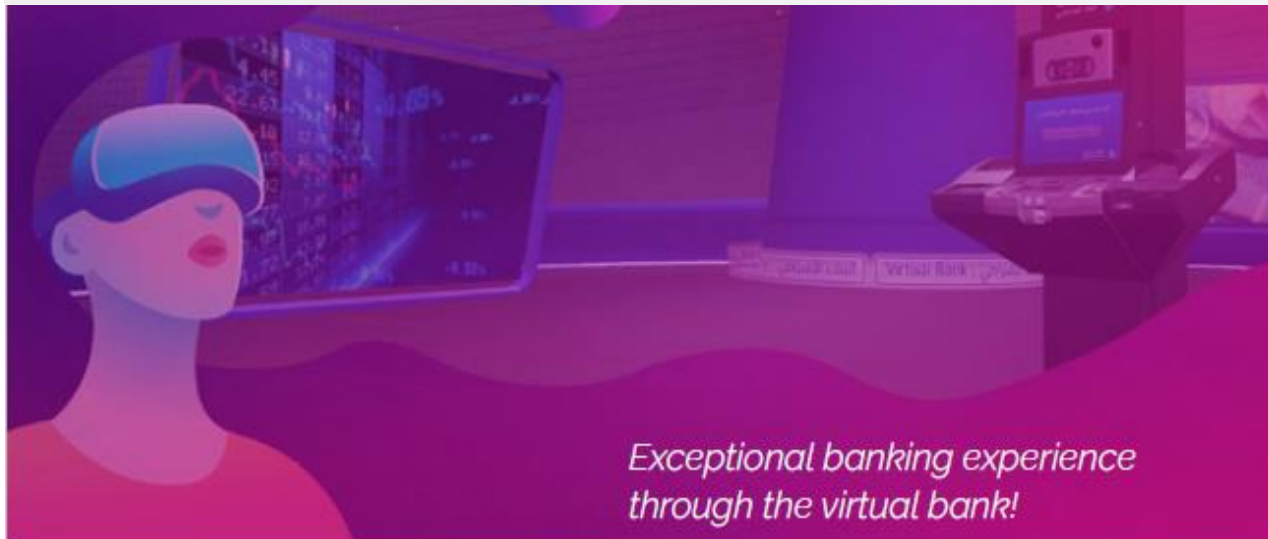

Safe & Secured

All information is provided in a secure virtual space. No physical interaction needed.

Engaging

Unique and entertaining user experience in an easy-to-use platform

Exceptional banking experience through the virtual bank!

TRAININGS & WORKSHOPS

We have organized several workshops in Palestine and Jordan. Around 300 people, from university students to private sector employees, have attended and benefitted from those workshops.

TECHNOPARK TRAINING

students from all West-Bank universities attended this intensive professional-level training about developing the Virtual & Augmented Reality Applications & Games using creative storytelling techniques.

Trainees were able to develop applications after the end of the training.

BRITISH ACADEMY AR & VR TRAINING

Trainees from different Jordanian universities, employees & military aviation have attended the extensive intermediate course about developing AR & VR Apps & Games for business and education.

AR & VR TRAINING – FIKRA

Several workshops and trainings were hosted by Fikra Innovation Hub, where More than 150 people have attended as freelancers, students, employees. Some of the attendees have excelled highly in the projects they've taken on.

We have also presented many AR & VR Workshops and Training for many valuable companies and institutions besides the virtual workshops.
